Content Of Workshop:

**Understanding Data and
Descriptive Statistics:**

*Dealing with Survey Data:
Understanding scaling – Nominal,
Ordinal, Interval, and Ratio scales.*

**Understanding Mean for
Interval Scale and T – Test**

DATE:

May 29, 2022

TIMING:

5.00 to 7.30 PM

Factor Analysis:

- Applicability and Scale Requirement for Exploratory Factor Analysis (EFA)
- Factor Analysis and Multicollinearity
- Reliability (Cronbach's Alpha)
- KMO and Barlett Test, Anti Image Matrix/ Identity Matrix
- Extracting Factors through rotated component matrix
- Naming factors and determining Inputs for Multiple Regression
- Regression:
- Saving the Factor Scores
- Applying Multiple Regression

Regression:-

- Saving the Factor Scores
- Applying Multiple Regression

Useful for:-

Students, Research Scholars, Faculty Members of Management, Computer Science, Medical, Pharmacy, Social Science, Education and Other allied Fields

Benefits:-

- E-Certificate to all participations by RES (Registered with MSME Government of India)
- Soft Copy of all Power Points Presentations
- Screenshots of all the steps of SPSS Software for – Mean, T-test, Factor Analysis and Regression Analysis.
- Data Files and Output Sheets for Future Practices
